### 3. HAZARDS IDENTIFICATION

**PRIMARY ROUTES OF ENTRY:** Inhalation of welding fumes

**EFFECTS OF OVEREXPOSURE:**

**INHALATION:** Welding fumes and gases can be dangerous to your health. Pre-existing respiratory or allergic conditions may be aggravated in some individuals.

**SKIN CONTACT:** Arc rays can burn skin. Electric shock can kill.

**EYE CONTACT:** Arc rays can injure eyes.

**MEDICAL CONDITIONS AGGRAVATED BY EXPOSURE:** Short-term (acute) overexposure to welding fumes may result in discomfort such as dizziness, nausea or dryness or irritation of nose, throat or eyes, tightness in chest, fever and allergic reactions (see Section 7).

**CHRONIC HEALTH HAZARDS:** Long-term (chronic) overexposure to welding fumes may lead to siderosis (iron deposits in the lungs) and is believed by some investigators to affect pulmonary function. Electric shock can kill.

### 4. FIRST AID MEASURES

**EMERGENCY FIRST AID PROCEDURES:**

**INHALATION:** Remove to fresh air, obtain medical attention. Employ first aid techniques recommended by American Red Cross.

**INGESTION:** Call for medical aid. Employ first aid techniques recommended by American Red Cross.

**SKIN CONTACT:** Call for medical aid. Employ first aid techniques recommended by American Red Cross.

**EYE CONTACT:** Call for medical aid. Employ first aid techniques recommended by American Red Cross.

### 7. HANDLING AND STORAGE

**SPECIAL PRECAUTIONS:** Read and understand the manufacturer's instructions and the precautionary label on this product. See American National Standard Z-49.1, Safety in Welding and cutting, published by the American Welding Society, P.O. ## 8. EXPOSURE CONTROLS / PERSONAL PROTECTION

**PRECAUTIONS TO BE TAKEN:** Read and understand the manufacturer's instructions and the precautionary label on this product. Use exhaust system to clear welding fumes. Make sure that inhaled air does not contain fume constituents above permissible exposure levels. NOTE: Other precautions for additional safety information on welding and cutting, see American Standard Z-49.1-1s, Safety in Welding and Cutting, and the Welding Handbook, Vol. 1, Chapter 9, Safe Practices in Welding and Cutting, both available from American Welding Society, Inc., 550 N.W. LeJeune Road, P.O. Box 351040, Miami FL 33135, Tel. 305-443-9353.

**RESPIRATORY:** Use respirable fume respirable or air supplied respirator when welding in a confined space or where local exhaust or ventilation does not keep exposure below the recommended exposure limit.

**SKIN PROTECTION:** Wear hand, head and body protection which help to prevent injury from radiation, sparks and electrical shock. See ANSI Z-49.1. At a minimum, this includes welder's gloves and a protective face shield, and may include arm protectors, aprons, hats, shoulder protection, as well as dark substantial clothing. Train the welder not to touch live electrical parts and to insulate himself from work and ground.

**EYE PROTECTION:** Wear helmet or use face shield with filter lens. Provide protect screens and flash goggles, if necessary, to shield others. As a rule of thumb, start with a shade that is too dark to see the weld zone. Then go to the next lighter shade which gives sufficient view of the weld zone.

**VENTILATION:** Use enough ventilation, local exhaust at the arc, or both to keep the fumes and gases from the worker's breathing zone and general area. Train the welder to keep his head out of the fumes.
