CSS TERMINALS (CRIMP-SOLDER-SEAL) P/N 17909-45
ASSORTMENT

FEATURES:

- Crimped for maximum reliability and easy installation
- Soldered for additional strength and better conductivity
- Sealed for durable insulation and watertight connection

1. Strip the wires 1/2".

2. Select a connector that matches the wire gauge and insert the wire into the solder chamber and terminal barrel.

3. Heat the wire with the crimping tool until the terminal barrel (the 1/2" of the barrel closest to the terminal end) is crimped around the wire. The crimping tool should be held at an angle to the terminal.

4. Apply heat until the length of the tubing (including the crimp) seals and the tubing fully encases and the adhesive flows.

5. Continue distributing the heat over the solder stream until the solder flows into the terminal barrel.

6. Remove from the heat and set cool for the ULTRATEM connection.
