

Product Applications

Car Shop

Chromate's external thread restorer works great on the following: there is a 1" diameter fine thread bolt on the plug door operating rod on the box cars. This bolt is always exposed and becomes rusty. The external thread restorer cleans the threads up beautifully.

External Thread Restorer

The Ultrasonic Diagnostic Kit is useful in finding leaks in the air lines on the box cars. The air lines are checked each time they leave the yard for 90 lbs pressure. They are allowed a 15 lb variance. The Ultrasonic Diagnostic Kit makes this job easier.

Ultrasonic Diagnostic Kit (The Ultrasonic Detective)

The 5/8" RazorQwik™ Carbide Tipped Hole Cutter is used for the installation of hand hold rails. These rails are installed by the ladders which are used to reach the top of the cars. Before, these rails were installed by burning holes. The 5/8" RazorQwik™ Carbide Tipped Hole Cutter is more efficient and makes for a cleaner installation.

Communication and Signal Shop

In the Communication & Signal (C & I) shop, good drill bits are needed to install bonding wires (chicken heads). Chromate's 5/16" & 3/8" CIC 200™ Pro™ Drills are just the ticket.
